PROJECTS

Family Safety App

Java · Firebase · Android Studio

- Developed a real-time family safety application for live location sharing and tracking.
- Implemented location history and emergency safety features using Firebase.
- Designed a responsive Android interface for seamless family communication and monitoring.

AI Resume Screening System

Python · Scikit-Learn · NLTK · Pandas · Flask

- Developed an AI-powered system to analyze resumes and extract relevant skills using NLP.
- Implemented machine learning-based candidate ranking against job descriptions.
- Built a Flask-based backend to process resumes and generate screening results.

LeetSync — Chrome Extension

JavaScript · Chrome Extension · Manifest V3 · GitHub REST API · Gemini API

- Developed a Chrome extension to automatically sync accepted LeetCode solutions to GitHub.
- Automated solution tracking and README generation using the GitHub REST API.
- Integrated Gemini API to assist with solution documentation and generation.
